Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended):

A software site license system comprising:

a client site having a target hardware device, said hardware device having a unique identifier;

a virtual warehouse website having a storage comprising a plurality of intangible software components, each of said components specifically selected for storage because each of said component is to be compatible for operating with said target hardware device;

a license generator generating a software site license comprising one or more of said components for said target hardware device, said software site license being stored in said virtual warehouse storage for later use; and

a programming workstation in communication with said target hardware device but acting as a separate entity from said target hardware device, said programming workstation receiving said software site license from said virtual warehouse storage on behalf of for said target device.

Claim 2 (original): The software site license system of claim 1, wherein said programming workstation receives an electronic file transfer comprising said license.

Claim 3 (original): The software site license system of claim 1, wherein said programming workstation stores a copy of said software site license.

Claim 4 (original): The software site license system of claim 1, wherein said virtual warehouse comprises a multi-password protected website comprising entry of a password unique to said client site and an ID unique to said target hardware device.

Claim 5 (original): The software site license system of claim 4, further comprising a priority level of access to said virtual warehouse.

Appl. No. 10/675,684
Resp. dated April 6, 2008

Reply to Action of Oct. 6, 2008

Claim 6 (previously amended): The software site license system of claim 1, wherein said programming workstation displays said components for confirmation from a user prior to said license generator generating said software site license.

Claim 7 (previously amended): The software site license system of claim 1, wherein said license sales site receives a purchase order from said client site comprising said target hardware device and in response to said order, a license sales site establishes said virtual warehouse for said client site and places said licensable components for said target hardware device in said virtual warehouse.

Claim 8 (original): The software site license system of claim 1, wherein said software site license comprises a master license for multiple target devices.

Claim 9 (previously amended): The software site license system of claim 1 further comprising:

a representative of said client site; and

a purchase order prepared by said representative and received at a license sales site, said order comprising said target hardware device, said representative having said programming workstation and installing said license to said target device prior to delivering said target to said client site.
